

Sec RI.1.1.x	Record Entry Lifecycle Event	From ISO/HL7 10781 EHR-S Functional Model R2 <ul style="list-style-type: none"> • RI – Record Infrastructure) • RI.1 – Record Lifecycle and Lifespan Occurs when Record Entry(ies)...	Value Set for codes: http://hl7.org/fhir/object-lifecycle	
1	Originate/Retain	Content is originated and retained – often during the course of an Action itself – to document the Action and its context	1	Origination / Creation
2	Update/Amend	Content is modified (from its original or previously retained state) – typically upon conclusion of an Action – to correct, update or complete content	3	Amendment
3	Translate/ Transform	Content is amended to include translation of content – typically to transform coded data from one coding/classification scheme to another, also from one human language to another	5	Translation
4	Attest	Content is attested for accuracy and completeness – typically during/after conclusion of an Action		
5	Access/View	Content is viewed or accessed	6	Access / Use
6	Output/Report	Content is output or reported	9	Report
7	Disclose	Content is disclosed according to organizational policy and/or jurisdictional law	11	Disclosure
8	Transmit	Content is transmitted – typically to an external entity or system	10	Export / Copy to target
9	Receive/Retain	Content is received and retained – typically from an external entity or system	2	Import / Copy from original
			12	Receipt of disclosure
10	De-Identify	Content is transformed into de-identified version	7	De-identification
11	Pseudonymize	Content is transformed into an pseudonymized version		
12	Re-Identify	Content is re-identified from a previously pseudonymized version		
13	Extract	Content is extracted to render subsets, derivations, summaries or aggregations	8	Aggregation, summarization, derivation
14	Archive	Are archived – typically to off-line (less readily available) storage media	13	Archiving
15	Restore	Are restored from archive		
16	Destroy/Delete	Are destroyed or identified as missing	14	Logical deletion
			15	Permanent erasure / Physical destruction
17	Deprecate	Are deprecated if found to be improperly identified or otherwise invalid		
18	Re-Activate	Are made active again after being previously Destroyed/Deleted or Deprecated		
19	Merge	Are merged together		
20	Unmerge	Are unmerged from previous merge		
21	Link	Are linked together		
22	Unlink	Are unlinked from previous linkage		
23	Add Legal Hold	Are marked (and held in an unaltered state) for purposes of a legal hold (typically as the result of court or legal action)		
24	Remove Legal Hold	Are released from legal hold (previously marked and held in unaltered state)		
25	Verify	Content is verified for accuracy, completeness	4	Verification
26	Encrypt	Content is encoded in a cipher or code		
27	Decrypt	Content is decoded from a cipher or code		

1	Origination / Creation
2	Import / Copy from original.
3	Amendment.
4	Verification.
5	Translation.
6	Access / Use.
7	De-identification.
8	Aggregation, summarization, derivation.
9	Report.
10	Export / Copy to target.
11	Disclosure.
12	Receipt of disclosure.
13	Archiving.
14	Logical deletion.
15	Permanent erasure / Physical destruction.
