EXECUTIVE SUMMARY

Release-3 EHR-S and PHR-S FIM

This executive-summary and report specifically address potential EHR impacts and/or EHR trends, which are important for the VA, IPO and DOD to-be aware-of.

Figure 1 HL7 EHR-S FIM release-3 Relationship with HL7 RIM-and-FHIR [Jan 2012 PSS #688]

INTRODUCTION: the *purpose* of this report is to document the EHR and PHR System release-3 Function-and-Information-Model (FIM) development and related projects impacting the release-3 FIM. An agile approach is being followed, where monthly report-content is refined; until ultimately, the report can be generated by the Sparx Enterprise Architect tool as a demonstration of the release-3 FIM “Easy-Button” Interoperability-Specification (IS) report-generation capability. All EHR WG release-3 FIM documentation published at http://wiki.hl7.org/index.php?title=EHR_Interoperability_WG are working-drafts.

LEGEND:

- 1) Capitalized and Underlined nouns-and-adjectives are Record-Entry data-types aka data-model, which should be in the EHR-S FM data dictionary; and, *italicized* verbs are *manage* sub-types aka verb-hierarchy. See www.skmtglossary.org for standard healthcare data-dictionary / glossary.
- 2) **Blue-Bold words** are recommended -additions to original text.
- 3) **Red-Bold words** are recommended-deletions from the original text.
- 4) **Highlighted Yellow words** are issues-Actions and/or important new material for the main EHR WG to-review.

GOAL: The *goal* of the Electronic Health Record (EHR) Work Group (WG) is to support the HL7 mission of developing standards for EHR data, information, functionality, and interoperability. The Work Group creates and promotes appropriate and necessary standards. EHR WG *objectives* include:

- 1) Functional-and-Information Requirements-**Specifications** for Electronic Health Records (EHR) and systems (**EHR-S**),
 - 2) Functional-and-Information Requirements-**Specifications** for Personal Health Records (PHR) and systems (**PHR-S**),
 - 3) Definition of a high-level framework to support the interoperability requirements-**specifications** and life cycles, and
 - 4) Identification of existing and emerging information **interoperability-requirements** and **related HL7 artifacts**.
- A Jan 2012 Project #688 System Function-and-Information Model release-3 (**EHR-S FIM r3**) *objective* of the EHR Interoperability WG is an **UML-specified EHR/PHR Concept-of-Operations (CONOPS), Reference Model (RM), set-of Function Use-Cases with Conformance-Criteria Scenarios; where, EHR-S FIM r3 is to-be**
 - create a clear, complete, concise, correct, consistent and easy-to-use; because,
 - **HL7 ballot-publishable from the Sparx Systems Enterprise-Architect tool**
 - **targeted for 3-to-5 years from now; because,**
 - **joint ISO-HL7 ballots are very challenging to manage and**
 - **sufficient-time is needed to address the structural issues identified by the EHR-S FM r2 ballot; where, VA voted negative, due to inconsistency, non-intuitiveness and unnecessary-complexity/non-usability.**
 - A *second-objective* of the EHR Interoperability WG is to produce a Meaningful Use profile for EHR-S FM r2 and r3.
 - The *objective* of the Resource Management Evidentiary Support (RM-ES) project team is to provide expertise to the EHR work group, other standards groups and the healthcare industry on records management, compliance, and data/record integrity for, EHR systems and related to EHR governance to support the use of medical records for clinical care and decision-making, business, legal and disclosure purposes.
 - The *objective* of the EHR Usability Project is to translate existing, well established usability guidelines and health information management principles into functional conformance-criteria in the EHR-S FM standard.

SITUATION

Release-3 EHR-S and PHR-S FIM Preparation

The complete-and-latest version of the Summary-Report is available at:

EHR/PHR **Concept-of-Operation** was defined-and-refined into a System **Reference-Model (RM)**; where,

- 1) **System Functions** are defined-by **Use-Case** lexicons-of *system-operations* bound-to System-entities; where,
 - a) System-operations are verbs refined into a “manage” operation-type-model (aka verb-hierarchy) and
 - b) System-entities are subject-and-object nouns refined into a Record-Entry data-type-model (aka information model)
 - c) Terminology value-sets are bound-to Record-Entry discrete-data-elements.
- 2) **Conformance Criteria** are defined-by a scenario-constrained use-case of
 - a) business-context and
 - b) subject-verb-object-terminology bindings; where,
- 3) **Scenario-Constrained Business-Context** is defined-by
 - a) pre-condition triggers,
 - b) applicability of
 - i) “The System SHOULD or SHALL or MAY”
 - ii) “provide-the-ability-to-manage Record-Entries” or “directly-manage Record-Entries.” where,
 - (1) a use-case constrained verb-hierarchy applies and
 - (2) a use-case constrained data-model applies; where,
 - c) post-condition Business-Rules are “according-to
 - scope-of-practice, organizational-policy, jurisdictional-law, and patient-preferences.”
- 4) **Information-Exchanges** are defined-by scenario subject-verb-object-terminology bindings mapped to
 - a) **FHIR** (Fast Healthcare Interoperability Resource), specifications which are representative of the International-Realm,
 - b) **FHIM** (Federal Health Information Model) US-Realm FHIR-profiles or alternative-realm FHIR-profiles,
 - c) **Terminology value-sets**, appropriate to the selected-realm,
 - d) **IHE information-exchange behavioral-protocols**, which may-be-refined-or-replaced by,
 - **SLA** and **DURSA** (Service-level-agreement Data-Use-and-Reciprocal-Support-Agreement) and
 - **KPPs** (Key Performance Parameters).
 - **Cost** estimation factors
- 5) **EHR-S/PHR-S Profile** is defined-by a set-of System-Function Use-Cases, with further constrained scenario
 - a) applicability
 - b) business-context
 - c) subject-verb-object-terminology bindings.
- 6) **Interoperability-Specifications** are generated with the FIM r3 “Easy-Button” aka reporting-tool.

MONTHLY SUMMARIES

(Reverse Chronological Order)

1 November 2013

7 For details see http://wiki.hl7.org/images/8/83/HL7_EHR-WG_Summary-Presentation_November_2013.pdf

- 9 1) **EHR WG** is waiting on the EHR-S FM Release-2 ISO ballot comments; where, the HL7 release-2 ballot-comments have already been reconciled. The ISO ballot closes on 3-Dec-2013; and then, the ISO-ballot-comments can be reconciled during December-and-January and EHR-S FM release-2 can be finalized in January 2014. The EHR WG has also been updating the EHR-S FM release-2 add-on to the Sparx EA-tool to support the creation of profiles.
- 14 2) **PHR WG** is waiting on the PHR FM Release-2 ISO ballot-comments, which close 3-Dec-2013 and will be reconciled during December-and-January; where, the HL7 release-2 ballot-comments have already been reconciled.
- 17 3) **EHR RMES WG** is discussing release authorization within the S&I Framework esMd group; where, esMD is analyzing the situation where healthcare-payers frequently request that providers submit additional medical-documentation for a specific claim, to support claims processing and other administrative functions, such as the identification of improper payments. Currently, Medicare Review Contractors request approximately 2 million medical documents per year by mailing a paper request letter via US Postal Service to healthcare providers. Until recently, providers had only two options for submitting the requested records: 1) mail paper or 2) send a fax. The manual paper process is costly, time consuming and can delay proper claims processing on both the senders' and receivers' end.
- 26 4) **EHR Usability WG** is collecting issues and mitigations into a reference library, which can be the basis of integrating usability into the release-3 EHR-S FIM.
- 28 5) **EHR Interoperability WG** focused on the May-2014 Meaningful-Use Profile for the EHR-S FM release-2 and preparation for release-3:2016; where, the November release-3 focus was to define Reference-Models for Concept-of-Operations, Function Information-and-Conformance-Criteria:
