

Meeting Minutes

CDISC-HL7 Stage I-B

March 13, 2008

11:00 am – 12:00 pm (EST)

Attendees / Affiliation

Jay Levine/FDA (Co-Chair)
Patty Garvey/FDA
Scott Getzin/Eli Lilly
Terry Hardin/IBM
Armando Oliva/FDA
Jason Rock/Global Submit
Diane Wold/GSK

Background

The Clinical Data Interchange Standards Consortium (CDISC) formed a Stage IB group to develop the requirements for the CDISC - Health Level 7 (HL7) Content to Message Project. It was agreed by FDA and CDISC to conduct a series of regular conference calls for sub-team members as the initial path forward on the CDISC HL7 IB activities.

The purpose of this meeting was to discuss the agenda for the face-to-face March 19, 2008 meeting.

Discussion

- The March 19, 2008 meeting will focus on the Study Participation storyboards. The group will capture the following storyboard high level ideas: who, what exchanged, how information used, and etc.
- The storyboards will need to be translated to messages, therefore it should describe the following content: players (who send), receive (who) and timing (trigger points).
- Any contents that are identified to be missing from Biomedical Research Integrated Domain Group (BRIDG) will be captured in the BRIDG gap analysis and forwarded to the BRIDG Technical Harmonization Committee.
