

FHIR Event Resource Pattern

Guidance on standard syntax issued by the FHIR team for any Resource that details event information.

July 5, 2016

Name	Flags	Card.	Type	W5	Description & Constraints
identifier	S	0..*	Identifier	id	Business identifier for event record
basedOn	S	0..*	Reference()		Request fulfilled by this event
parent	S	0..*	Reference()		Part of this occurrence
status	IS	1..1	code	status	draft active suspended completed
code	S	0..1	CodeableConcept	what	What was done
subject	S	1..1	Reference(Patient Group? ??)	who.focus	Individual the service is done for
context	S	0..1	Reference(Encounter EpisodeOfCare)	context	Encounter or Episode during which event occurred
occurrence[x]	S	0..1	dateTime Period Schedule?	when.occurred	When service occurred occur
performer	S	0..1	Reference(Practitioner Organization Patient Device RelatedPerson)	who.performer	Performer of service
reason[x]	S	0..1	CodeableConcept Reference(??)	why	Why is service necessary?
note		0..*	Annotation		Comments made about the service request

Commented [L1]: Could also be a reference to Medication|Substance|Device being requested (and name might change if you're doing that)

Commented [L2]: Can be 0..1 for "bulk" orders (e.g. bulk supplies), though may want those to be a distinct resource. May need to revisit this if we include definition
